**This agreement presents the requirements for special inspection, testing and structural observation for commercial, industrial, multi-family, and certain portions of residential construction designed following the current Oregon Structural Specialty Code [OSSC] or Oregon Residential Specialty Code [ORSC].**

For a building permit to be issued, the owner or the owner's authorized agent shall complete and sign Sections C and D of this agreement acknowledging their understanding, and intent to comply with, the requirements of the *Special Inspection and Structural Observations Program*.

In accordance with the "CONSTRUCTION DOCUMENTS" section of the Oregon Structural Specialty Code (OSSC) and the relevant sections of Chapter 17, the structural observations and on-site special inspections have been identified in a program statement prepared by the registered and design professional in responsible charge for all work that falls within the categories specifically identified therein.

The program statement will be included within the approved construction documents, and the special inspections and structural observations will be determined and administered from this statement.

All special inspections identified within the statement presented in the approved construction documents shall be inspected or tested in accordance with the provisions of OSSC Chapter 17. The special inspector shall comply with the duties and responsibilities presented in [the OBOA Special Inspection Program](#) and shall observe and document the work for conformance with the approved plans and specifications. All written results of these inspections or tests, including noncompliance lists and final summary letters, shall be provided to the Building Official and the registered design professional in responsible charge.

**Special inspections are in addition to, and do not replace, inspections required to be performed by City inspectors. Before proceeding with the project, City inspectors must approve all work after a report by the special inspector has been provided.** Example: Prior to placing concrete in a footing/foundation, approval by BOTH the special inspector and City inspector must be obtained if required by this agreement.

### **Special Inspection/Testing and Structural Observation Agreement**

The final special inspection and structural observation reports shall be submitted to the Building Services Division a **minimum of two days prior to requesting a final inspection**. A final inspection request will not be granted until the final special inspection and structural observation reports have been deemed acceptable by the Building Services Division.

- A. SPECIAL INSPECTION AND TESTING (To be completed by plans examiner)** The following inspections have been indicated within the program statement prepared by the design professional in responsible charge:

Inspection of Fabricators	Cast-in-Place Deep Foundations (Pier Foundation)

From the list below, indicate the special inspection agency(s) assigned to perform the inspections. The OBOA – approved agency list is provided for your convenience.

A special Inspection agency may be chosen from any of the approved inspector lists accepted by the Building Services Division. Building Services Division recognizes the agency lists published by the Oregon Building Officials Association (OBOA) and the Washington Association of Building Officials (WABO).

If the agency you desire to employ is not included within the approved lists, use the “other” box to indicate the agency or inspector you intend to use. A written request to use this agency or individual shall be submitted to the Building Division, and the agency’s qualifications and documentation demonstrating competence to perform inspections for the type of construction in question must be presented to the Building Official for review.

If multiple special inspections are required, and multiple agencies will be used, identify each agency and the special inspections they will perform.
